**(54) Title:** EMERGENCY RELEASE APPARATUS

**(57) Abstract:** An emergency release apparatus comprises: an air tube having an accommodation space for an evacuee and for protecting the evacuee from an external impact; a rope connected to the air tube, having one end fixed to an evacuation place, and having a length long enough to reach the ground; and a controller mounted in the air tube and connected to the rope, for descending the air tube in which the evacuee is accommodated to the ground at a safe speed. Accordingly, the apparatus protects the evacuee from an external impact, etc. when the evacuee descends to the ground.
